**DON'T *POLLUTE*
JORDAN LAKE!**

ONLY RAIN DOWN THE STORM DRAIN

We decide what ends up in the waters
of our creeks and Jordan Lake.

Even grass clippings, loose leaves, and pet waste can pollute Jordan Lake and drinking water sources.

Volunteers helped protect local waterways by putting special markers on storm drains near you. We're letting folks know that storm drains are really only for rain water.

Because everything that goes into the storm drain eventually goes untreated into our creeks, the source of water for drinking, cooking, bathing, and just about everything else.

Look for this marker on a storm drain near you:
