

Booker Creek Working Group
December 6, 2021
6-7:30 pm

Agenda

Welcome & Review Agenda

Check in

Review Mayor's Charges & Council feedback

Adopt mission statement

Presentations from Charlotte- Mecklenburg

(15 minutes) Leslie Vanden Herik: Mecklenburg Soil and Water Conservation District

(30 minutes) David Kroening: Charlotte-Mecklenburg Storm Water Services

Working group discussion

Hear from members their ideas for future agenda items

Next steps

- January meeting date
- Standing meeting time – Every three weeks?

Public input (10 minutes)

Possible Future Working Group Agenda Items

1. Two presentations from staff:

- Who are staff and what they do
- Talk specifically about the content of the watershed studies

2. A briefing by Town stormwater staff on their program activities to meet the three goals of stormwater management: reduce flooding, improve water quality, and protect and restore natural stream channels.

3. Barbara Doll of NCSU showing us available information about monetary flood damages in the Booker Creek basin and how this might be used in prioritizing projects. Also explaining her approach to community flood damage reduction planning.

4. Michael Dupree presenting his work in Durham to reach out to property owners to assist them with good stormwater management practices and the funding sources he developed for the program.

5. A review of flood proofing measures adopted at Eastgate shopping center and the extent to which they have been effective. The potential of such measures to reduce flood damages in Chapel Hill.
