

Booker Creek Working Group
Background information +
January 31, 2022 Agenda
6-8 pm

Desired Outcomes

What would we like to see accomplished as a result of this meeting?

- Better connections with the large group
- Continued information gathering to respond to Mayor Hemminger's questions:
 - * Where is it flooding in our community and by how much? (in layman's terms - 6 inches, etc) how many homes, streets & businesses?
 - * What ideas can help reduce flooding during big storm events - and by how much?
- Group conversations to explore targeted questions related to presentations

What guiding questions would we like to address?

1. What ideas are promising and worth further consideration for our recommendations?
2. What additional information do we need to help us develop our recommendations?
3. How can we improve and evolve the organization of our meetings to help us be successful?

Agenda

please note: there will be a 5 minute break around 7 pm

Roll call & Announcements (10 minutes)

Presentation: Antonia Sebastian (30 minutes)

Working Group Member Antonia Sebastian will share her experience with assessing flooding from the engineering perspective (25 minutes).
