**Subject:** Update on environmental concerns: current police station site

After voluntarily completing an investigation, and subsequently receiving a request from NC DEQ on October 3, 2017 that the Town prepare a remedial plan under an Administrative Agreement with NC DEQ for the Town Police Station property at 828 Martin Luther King, Jr. Blvd, we have communicated with our environmental attorney and are evaluating the options going forward. The options include possibly utilizing the NC brownfields program. We will take several months to review these options and report back to Council prior to any further steps being taken.

If you have any questions, please let me know.

**Roger L. Stancil**
